

Building Surveyor UK-Wide

The Building Surveyor role is responsible for a selection of telecom building projects including assessing the quality of the telecom infrastructure build including examining the condition of buildings and advising

architects and builders on maintenance procedures, keeping safety standards high, advising on tenders and contractors.

- Project management, control and tracking ranging from complex to simple projects.
- Undertaking Building Surveyor's inspections and preparing reports giving advice on costs and procurement.
- Preparing specifications and works schedules for, and administering, repair and refurbishment contracts.

The successful candidates are likely to have experience working in the specialist telecoms building sector (for either operators, landlords, or both!). Being a Chartered Surveyor will help but it is not essential.

A competitive package and flexible terms are on offer for the right candidates. To apply, please click the link and apply!
